

BENNINGTON COLLEGE

Bennington College provides multiple opportunities for safety training to maximize the health, safety, and well-being of all those employed by the college. We understand your time is valuable and we therefore seek to provide training in the most effective and efficient manner possible. By utilization of both classroom and computer-based training (CBT), together we can realize a reduction in workplace injuries and change the habits and behaviors that may result in workplace accidents. Each supervisor should review the topic list below with employees to determine which trainings are applicable, and plan to attend the scheduled classes or request access to the CBT. All classroom trainings will be held in Barn 100 on the dates listed below.

Classroom Training Topics	10/14/2011	12/12/2011	2/1/2012	6/12/2012
